Finishes

The Aluchainor QKCLC Chain Link Curtain is available in anodized, powder-coated, and polished finishes. The anodized finish offers excellent corrosion resistance with a smooth metallic look in various colors. Powder coating provides a vibrant, weather-resistant surface, while the polished finish adds a sleek, reflective shine for premium decorative appeal.

Installation Detail

The Aluchainor QKCLC Chain Link Curtain is easy to install and suits a variety of spaces. It can be mounted to ceilings, walls, or door frames using simple hardware and track systems.

STRAIGHT TRACK

The straight track system is the most commonly used and cost-effective installation method. It features a rigid, linear rail with uniformly spaced pre-drilled holes for quick and secure mounting. Designed specifically for straight chain link curtains, this installation type is ideal for wall or ceiling applications where a fixed, non-movable curtain is desired. With minimal accessories required, it offers a clean, durable, and permanent solution for partitions or decorative enhancements.

CURVED TRACK

Curved track installation offers a versatile and visually striking alternative for spaces requiring a non-linear layout. Engineered with a pre-formed cambered shape, the track seamlessly follows architectural curves and accommodates custom design conditions. Like the straight track, curtains mounted on curved tracks remain fixed in place and do not slide. This method is especially suitable for hotels, restaurants, office interiors, and any environment where an elegant, curved space divider or bespoke partition is required.
