GLASMETIS -QKGDBX

Wire Mesh Laminated Glass

GLASMETIS - QKGDBX Wire Mesh Laminated Mesh Glass combines laminated glass with fine metal mesh to deliver superior strength, impact resistance, and visual elegance—ideal for façades, feature walls, partitions, and elevators in modern architecture.

Glasmetis -QKGDBX

Wire Mesh Laminated Glass

The Glasmetis - QKGDBX Laminated Mesh Glass is a sophisticated architectural material that merges laminated glass with a delicate yet durable layer of stainless steel, brass, or copper mesh. This combination ensures both safety and aesthetic appeal. In the event of breakage, the mesh retains the glass fragments, adding an extra layer of protection. Its woven texture creates a dynamic interplay of light and shadow, enhancing any space with subtle elegance. Ideal for both interior and exterior applications, including façades, partitions, elevators, and feature walls, QKGDBX is available in a variety of colors, patterns, and finishes—allowing designers to bring custom visions to life.
