14 GLASMETIS -QKGTH Laminated Wire Mesh Glass Panel

GLASMETIS - QKGTH Laminated Wire Mesh Glass Panel integrates finely woven metal mesh within laminated glass to deliver strength, safety, and texture—perfect for façades, partitions, elevators, and modern interior walls.

Glasmetis -QKGTH Laminated Wire Mesh Glass Panel

The Glasmetis - QKDGB Laminated Mesh Glass is a high-performance architectural solution that combines the clarity of glass with the strength and texture of fine metal mesh. Made from stainless steel, brass, or copper, the embedded mesh reinforces the glass while creating a visually dynamic surface. Even if broken, the mesh holds the fragments together, ensuring continued safety and integrity. QKGTH also offers sound insulation, privacy, and soft light diffusion—ideal for façades, elevators, partitions, and feature walls. Customizable in size, color, and finish, including fire-resistant and low-e options, it brings elegance, durability, and design flexibility to modern architecture.
