GLASMETIS -QKGWWD Wire Woven Glass Panel

GLASMETIS - QKGWWD Wire Woven Glass Panel

is fuses laminated glass with woven metal mesh to provide enhanced safety, strength, and modern appeal—ideal for façades, partitions, doors, and elevator interiors.

Glasmetis -QKGWWD

Wire Woven Glass Panel

The Glasmetis - QKDGB Laminated Mesh Glass is a modern architectural solution that integrates laminated glass with woven metal mesh—crafted from stainless steel, brass, or copper—for superior strength, impact resistance, and design flexibility. The embedded mesh holds broken glass fragments in place, ensuring ongoing safety while creating visual depth and texture. Ideal for partitions, façades, doors, and elevator interiors, it enhances spaces with light diffusion and a refined metallic sheen. With customizable sizes, finishes, and mesh styles, QKGWWD adapts beautifully to both interior and exterior environments where performance and elegance must coexist.
