ALUCHAINOR -QKCLC

Gradient Chain Link Curtain

ALUCHAINOR-QKCLC Gradient Chain Link Curtain

combines modern style with durable performance. Made from lightweight 100% aluminum alloy, it is rust-resistant, easy to install, and suitable for both indoor and outdoor spaces. With its gradient multicolor design, the curtain enhances airflow and light while adding an artistic flair. Perfect for doorways, dividers, showrooms, cafes, or decorative displays, it offers a versatile solution for both residential and commercial interiors.

ALUCHAINOR-QKCLC

Gradient Chain Link Curtain

Aluchainor QKCLC Gradient Chain Link Curtain is crafted from premium aluminum alloy, ensuring both durability and lightweight handling. The tightly looped chain links form a semi-transparent surface that balances strength with elegance, allowing airflow and light to pass through while defining spaces with style. An anodized surface treatment enhances corrosion resistance, ensures long-lasting performance, and delivers vibrant metallic finishes. Its flexible hook system simplifies installation, enabling designers and homeowners to adapt the curtain for a wide range of applications, from partitions to decorative displays.

Installation Detail

The Aluchainor QKCLC Chain Link Curtain is easy to install and suits a variety of spaces. It can be mounted to ceilings, walls, or door frames using simple hardware and track systems.

STRAIGHT TRACK

The straight track system is the most commonly used and cost-effective installation method. It features a rigid, linear rail with uniformly spaced pre-drilled holes for quick and secure mounting. Designed specifically for straight chain link curtains, this installation type is ideal for wall or ceiling applications where a fixed, non-movable curtain is desired. With minimal accessories required, it offers a clean, durable, and permanent solution for partitions or decorative enhancements.

CURVED TRACK

Curved track installation offers a versatile and visually striking alternative for spaces requiring a non-linear layout. Engineered with a pre-formed cambered shape, the track seamlessly follows architectural curves and accommodates custom design conditions. Like the straight track, curtains mounted on curved tracks remain fixed in place and do not slide. This method is especially suitable for hotels, restaurants, office interiors, and any environment where an elegant, curved space divider or bespoke partition is required.
