RATTANA -P3CS-Corner Weaving Synthetic Rattan Panel

RATTANA – P3CS Corner Weaving Synthetic Rattan Panel is a handcrafted PE rattan panel designed for interior and exterior use. With UV-resistant fibers, waterproof materials, and a rustproof aluminum frame, it delivers long-lasting beauty. Its corner-weave pattern adds depth to walls, ceilings, and feature installations.

Rattana -P4RS3DM

Corner Weaving Synthetic Rattan Panel

The RATTANA P4RS3DM Corner Weaving Synthetic Rattan Panel blends clean geometry with woven texture, creating a warm yet structured look. It is ideal for walls, ceilings, doors, partitions, and furniture in homes, cafés, and resorts. The synthetic rattan is UV-safe, moisture-resistant, and suitable for indoor and outdoor use. A fire-retardant version is available upon request for projects needing added safety. Custom rattan patterns and color options can also be produced to match specific design themes. Lightweight and easy to install, the panel delivers long-lasting performance with a refined, natural feel.

Finishes

The RATTANA P3CS panel features a handwoven corner-weave finish crafted from UV-resistant PE rattan. Its powder-coated aluminum frame adds a clean, durable edge suited for indoor and outdoor use. Natural rattan textures, earthy tones, and custom color options provide a refined, modern look for any design style.

Installation Detail

Install the RATTANA P3CS panel by fixing the powder-coated aluminum frame directly to the wall or structural beam using stainless-steel bolts. Ensure the surface is level, then secure all sides for a firm hold. Because the panel is lightweight, handling and positioning are simple, making installation fast and clean.
