Rattana -P10DI

Dense Irregular Synthetic Rattan Panel

RATTANA – P10DI Dense Irregular Synthetic Rattan Panel combines the natural appeal of woven rattan with the strength of modern materials. Crafted from durable HDPE, this 3D woven wall panel creates a distinctive architectural woven wall texture that enhances feature walls, partitions, and decorative cladding. The dense irregular weave adds depth and visual interest while maintaining long-term performance. Unlike natural rattan, the synthetic material resists moisture, wear, and insects, making it ideal for hospitality, retail, and residential interiors. Available in custom sizes and multiple colors, it offers designers a versatile luxury interior wall cladding solution.

Finishes

The RATTANA – P10DI Dense Irregular Synthetic Rattan Panel is available in a range of standard colors including brown, yellow, green, red, grey, and dark brown. Custom colors can also be produced to match specific interior themes. The synthetic rattan strands feature a natural woven texture that replicates traditional rattan while providing enhanced durability and color consistency.

Installation Detail

The RATTANA – P10DI Dense Irregular Synthetic Rattan Panel can be installed on plywood, MDF, gypsum board, or metal framing substrates. Ensure the surface is clean, dry, and level before installation. Panels may be fixed using screws with finishing caps or construction adhesive, depending on project requirements. For large installations, use proper alignment and spacing to maintain the woven pattern continuity. Professional installation is recommended for best results.
