Rattan Wood Finish Panels
Rattaframe -CFRWFP

RATTAFRAME-CFRWFP Rattan Wood Finish Panels combine woven HDPE synthetic rattan with a durable framed structure for modern architectural interiors. The panel is available with a metal frame featuring a wood finish or a standard aluminum frame. In addition, the rattan pattern, panel size, shape, and color can be customized to suit different projects. The panel works well for decorative walls, ceilings, partitions, room dividers, hotel interiors, restaurants, retail spaces, offices, and residential applications. A fire-retardant rattan option is available upon request, subject to the selected specification and required testing.

Installation Detail

Sunflower Synthetic Rattan Panel RATTANA-P40SF installed as a decorative wall panel, partition, screen, or cladding surface using suitable mechanical fixing methods based on the project substrate. Before installation, ensure the surface is clean, level, dry, and structurally sound. Carefully align each panel to maintain the continuous radial pattern, and provide suitable support for custom-sized panels. Installation should follow project-specific fixing and safety requirements.
