Twisted Synthetic Rattan Panel
Rattana -CFTNSRP

RATTANA-CFTNSRP combines the natural appearance of woven rattan with the durability of synthetic materials. Its twisted weave creates a warm, textured surface for contemporary interiors. The product comes as woven rattan sheets or rolls, or as woven rattan integrated with aluminum or wood panels. Moreover, UV resistance helps retain colour when exposed to sunlight, while fire-resistant options support projects with specific performance requirements. Use it for feature walls, ceilings, partitions, wall coverings, wall cladding, hospitality spaces, offices, retail interiors, and residential applications.

MATERIAL

HDPE Synthetic Rattan

DIMENSION

Weave Size	21 × 0.8 mm
Thickness Rattan	2–3 mm
Length × Width	As requested

Finishes

Twisted Natural Synthetic Rattan Panel RATTANA-CFTNSRP features a natural woven rattan finish with a twisted texture and warm organic appearance. Choose woven rattan sheets or rolls, or select aluminum or wood-backed panels for a more structured finish. Custom colours and finishes may be available. UV-resistant and fire-resistant options can also be specified for project requirements.

Installation Detail

Install RATTANA-CFTNSRP according to the selected format and project requirements. For sheets or rolls, prepare a clean, dry, and level surface before fixing the material with a suitable adhesive or mechanical fixing system. For aluminum or wood-backed panels, use the appropriate mounting system for the substrate. Align each panel carefully to maintain a consistent woven pattern. Always confirm fixing methods and substrate requirements before installation.
